### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Chet Martin on July 12, 2004.

The application has been amended as follows:

In claim 9, line 9, the term "of claim 5" is replaced with --of claim 6--.

This amendment is necessary to ensure clarity of the claims.

### ***Specification***

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Allowable Subject Matter***

Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance: Claims 1 and 6 include the limitations that a gas correlation radiometer optimization method comprises determining a numerical value for contrast minus similarity between a target gas spectrum and a competitive gas spectrum.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lessure, U. S. Patent No. 5,886,348, describes an infrared gas analyzer comprising a plurality of filters selected to enable analysis of target gases, but does not teach methods of optimization of the infrared filters.
